Hello everyone,

I'd like to set up a meeting at GSI so the developers concerned with tracking have a working platform.
The tentative agenda point is Track Merging. This point was roughly discussed several times but no concrete implementation is done so far.

I propose to capture a time slot in parallel to the coordination and technical board meetings on Wednesday morning, where space for tutorials was kept free. Maybe Johan may comment on that.

Please give your input here and tell if you want to attend.

Kind regards, Ralf.
