Hi Stefano,

you were right! After updating (to the rev. 6858) and cleaning up everything I am able to run run\_digi\_stt\_sttcombi.C and run\_reco\_sttcombi.C from tutorial/lhetrack. But now I have the next problem when I run run\_kalman\_stt.C. It crashes with the following output:

Cross section calculation concluded successfully

-I- FairMCApplication:: Monte carlo Engine Initialisation with TGeant3TGeo

I- FairGeane::FairGeane: Geane is Initialized

-E- FairRootManager Branch: PndTpcCluster not found in Tree

Do you have an idea what's wrong?
