Yes, I think you have load two additional libraries to solve this error (it was changed in gconfig/rootlogon.C). See the 3rd and 4th posts in this thread.

In the macro you use to load the PandaRoot libraries, PndBase and GlobalTasks have to be added:

```
...  
gSystem->Load("libBase")  
gSystem->Load("libPndBase") (<- here to add)  
gSystem->Load("libGlobalTasks") (<- here to add)  
gSystem->Load("libTrkBase")  
...
```
