Hi Florian,

I am trying to install cbmroot in my account aprakash. I have downloaded the latest cbmroot via svn

I am getting the following error

```
aparakash@lxi018:~/build$ make
```

```
[ 0%] Generating FairDict.cxx, FairDict.h
```

```
/bin/sh: /misc/cbmsoft/Etch64/jul09/fairsoft/tools/root/bin/rootcint: cannot execute binary file
```

```
make[2]: *** [base/FairDict.cxx] Error 126
```

```
make[1]: *** [base/CMakeFiles/Base.dir/all] Error 2
```

```
make: *** [all] Error 2
```

Thanks in advance

Best Regards

Arun Prakash
