Hi,

Is there any other list(s)? >>>

I registered and login'ed but it is the only one list I see...

Hi,

the other "lists" are controlled by the CBM group. As soon as the group administrator has put your ID on this list, you should see the other fora as well.

You have to login to the forum see the CBM forums. Since all modern browsers support some sort a 'password cache' this is not a big deal.

If other topical forums are wanted, just ask and more can quickly be created. But that makes only sense if the first one gets actually used.

Ok, since you posted a message, you were obviously logged in . Since you are also enlisted in the "CBM Group", you should see all CBM forums and be able to post to them. If that is still not possible, please send me a direct email so that we can figure out what the problem is.

Cheers, Walter

Subject: Forum permissions?

Hi,

I observe a behaviour concerning the CBM fora which seems a bit strange: as "Anonymous" I can see and read all fora, but as soon as I logg in, they turn into visible but not readable.

Cheers,
Olaf.

This was indeed a bug in the forum software (FUD 2.6.0 version). On friday April 16th in the afternoon the GSI installation was updated to FUD 2.6.2, and in this version this problem is fixed.
