Hi Code-Developers,

I tried to compile the latest version of pandaRoot (rev. 889) and I get the following error message:

```
../../../../pandaroot/tpc/tpcreco/TpcConfTrackFinder.cxx: In member function 'void
TpcConfTrackFinder::mergeTracks(Track*, Track*)':
../../../../pandaroot/tpc/tpcreco/TpcConfTrackFinder.cxx:251: error: 'class Track' has no member
named 'mergeHits'
```

It would be nice if somebody could fix this problem

Thanks

Tobias

Thanks! It works now. I did not realize that svn update did not run through.

Tobias
