Dear all,  
somebody of you know which particle is associated to the PDGCode  
10010020.

This number gives me problem when i run my simulation with geant4  
but with genat3 works.

cheers  
Alicia.

It should be the deuteron,  
probably there are no lists activated for this kind of particle, than g4 gives problem. We know  
that our g4 lists are not reliable
