hi
in the new repository(cmake)
how to do make distclean?

Is make clean enough?

cheers ALicia.

Hi Alicia

There is nothing like distclean in cmake. The way to do it is
to do an out-of-source build in a dedicated build directory which is required in our setup
anyway. To make something equivalent to a distclean is to do a `rm -rf` in the build directory. But
be carefull that your are really in the build
directory.

Ciao

Florian
