Subject: geant4.8.3 problem with G4String
Posted by Tobias Stockmanns on Tue, 21 Aug 2007 12:13:35 GMT

Dear programmers,

I still try to move from geant4.8.2 to geant4.8.3 on my home system to get the DPM simulation running again. Unfortunately I get the following error when I try to recompile pandaRoot:

/home/stockman/fairroot/cbmsoft/transport/geant4/include/G4ExcitedString .hh:
171: error: conversion from ´const char [66]´ to non-scalar type ´G4String´ requested

and some more of this kind, all complainingn that the conversion from char [] to G4String gives an error.

I hope somebody has an idea what caused this problem.

Thanks,

Tobias

Hi,
just one question, probably not connected to your problem.
Did you recompile even VMC?

No I did not.

But I will try it immediatly.

Cheers,

Tobias
