Hi everybody,
I'm running a simulation in PandaRoot, but I get the error below.
Does someone have an idea on what is happening?

Thanks in advance,

Annalisa

```
-E- CbmStack: Particle index -1078698388 not found in dex map!  
Fatal in <CbmStack::CbmStack::UpdateTrackIndex>: Particle index not found in map  
aborting  
(no debugging symbols found)  
Using host libthread_db library "/lib/libthread_db.so.1".  
Attaching to program: /proc/25865/exe, process 25865  
'shared object read from target memory' has disappeared; keeping its symbols.

Hi Annalysa,
I had actually problem
try to see
what does the ResetParameters() in your ProcessHits do?

This function should put to zero your members functions, i can be that the default value is not zero.

In your CbmDrc.h
there is this initialization
try to put all the values to zero.

```
inline void CbmDrc::ResetParameters() {
    fTrackID = -999;
    fCopyNo = -999;
    fPos.SetXYZT(-999., -999., -999., -999.);
    fMom.SetXYZT(-999., -999., -999., -999.) ;
    fTime = -999;
    fLength = -999;
    fELoss = -999;
    fmass = -999;
    fflag = -999;
    fEventID = -999;
}
```
