Dear all,

the problem with using AliEn in 64bit Debian Etch environment is solved.

By doing, e.g.:

```
. alilogin v4-06-Rev-03
```

```
. /u/aliprod/bin/.alienv213_64login
```

```
(
```

```
alien proxy-init
```

```
alien-token-init
```

```
)
```

```
source /tmp/gclient_env_$UID
```

```
aliroot
```

```
root [0] TGrid::Connect("alien://")
```

```
TFile *file = TFile::Open("alien:///alice/simulation/2007/PDC07...")
```

everything should work fine, now.

Cheers,

Kilian
