Dear all,
i have just updated my code, and i'm surprised
to see that the geane recotask and trackrep directories
don't compile properly.

who knows what is going on?,

here you are the compile output

```
[ 95%] Generating GeaneDict.cxx, GeaneDict.h

Hi Alicia!

Please make sure to update also the genfit package - this could be the reason for the error in trackrep.

For me everything works fine with the latest version.

Cheers! Sebastian.

Hi Sebastian,
thanks a lot , now recotask, genfit, tpc, trackbase, trackrep
compile, but i have still problems with geane, should i update
anything else?

```
[ 95%] Building CXX object geane/CMakeFiles/Geane.dir/CbmGeanePro.o
/u/asanchez/fairroot_prueba/pandaroot/geane/CbmGeanePro.cxx: In member function

Hi Alicia,

the reason of the error is due to the use of an old version of the external packages (in particular of the TGeant3 class in tracking). The files are correctly updated on the Cern site but have not yet been included in the external packages tar file on the cbmroot site. During the last meeting at GSI Mohammad said that it will be included in the next update of cbmroot, along with geant4.9, which I hope will happen soon.

Hope this helps,
Andrea

Hi Andrea
thanks a lot for the comment.

By the way there is already the possibility to ask for the length of the track in GEANE?

best regrads
Alicia.

Hi Sebastian,
now i get error mesasages when i try to run runMC.C inside of /recotask/demo,
it seems that some library is still missing,

```
lxi011:demo>root runMC.C -l
root [0]
Processing runMC.C...
```

PSaid instance created... access via gSaid->f()

Hi again, i have noticed that
in order to be able to run the runMC.C in
/recotask/demo/

one should add in runMC.C
libtpcrecotask
libgeane
libtrackrep

Hi Alicia,
yes, this possibility is already there. It was always there
for the extrapolation to the PCA, but after your request I have
also added the possibility to get it also when extrapolating
to a volume or to a plane.

This is unfortunately going into the external packages and it is
exactly what the missing function of the previous error is also
doing (SetClose and GetClose).

I will get in touch with Mohammad to coordinate the distribution
of the new external packages as soon as possible: I think that

also Mohammad has an update version.

Hope it will not take too long: I thought this was done already.

Ciao,
Andrea
