Dear all,
by running geant4(in external packages)
i get the following error
So what is going on with the
TG4PhysicsListOptions libraies?

```
lxi008:geane>xemacs runMC1.C
```

```
lxi008:geane>root runMC1.C -l
```

```

I have the feeling that TG4PhysicsListOptions was removed in the last VMC version.
Which release of the external packages are you using?
You could try to comment out those lines from the g4Config.C file, if you are using the development

Hi,

could it be that the space is removed between
TG4PhysicsListOptions and options in your G4Config.C macro?

at least that what I see in your output.

regards

Mohammad

Hi
No it is separated
like that
TG4PhysicsListOptions options
but i will try to put more blanks in between.

SO

it doesn't work
even if i put more blanks.
I get the same error message.

Any ideas?
