Hello,

the Tpc classes have been renamed to fit the new naming convention. Please update /tpc and /recotasks directories.

The tpc macros have NOT been changed to fit the new naming. However, a short script (replace.sh) was added to the macro/tpc folder that should do it for you.

You can use that script to automatically change any of your macros and/or classes that use Tpc-classes. Simply run it in the folder with the files that need updating. The script simply replaces "Tpc" with "PndTpc" strings in all files in the folder.
