Dear all,

there will a PandaRoot EVO Meeting WED, Nov 28

at a different starting time(!)

10:00 european time
(= 17:00 chinese time)

(the votes for the changed meeting start time were 5:2 positive,
and all speakers were confirmed that they have time.
Apologies to Annalisa, but this will be 1 am at SLAC).
Audio testing from 09:30.
This time I will reserve the meeting for 5 hours duration
while honestly hoping that we might not need the time.

Tentative agenda:

1.) Aleksandra Biegun
news from FEEMC (= emc 3)

2.) Chris Strackbein, Martin Kotulla
news from the comparison data vs. PandaRoot
for 5x5 emc module matrix

3.) agenda for collaboration meeting
(in particular:
what new physics results are we going to show?)

4.) anything else
(e.g. cernlib 64-bit).

best regards, Soeren and Johan.

Hi,

Something to add to the agenda. Some time ago, I had a discussion with Volker Friese about a joint discussion meeting for CBM and Panda computing. I personally think this is not a bad idea, since both of the collaborations are making use of the same underlying framework, with the same problems etc. Furthermore, there is a lot of software development going on which can be useful both collaboration. Something to discuss internally....

Johan.
