Hello,

DIM is a communication system for distributed / mixed environments. It provides a network transparent inter-process communication layer and is a light protocol with high performance based on TCP/IP. DIM has been developed at CERN and is available for Linux, Unix, Linux, Windows, OS9, LynxOS and VxWorks. Available interfaces are Fortran, C and C++. For more information about DIM see <http://dim.web.cern.ch/dim/>.

I have developed a DIM interface of LabVIEW that is based on the official DIM distribution. By this, LabVIEW can be linked to all platforms supported by DIM.

The LabVIEW interface is available under the terms of the GPL. It can be downloaded from <http://www-w2k.gsi.de/labview/driver.htm#Communication%20Drivers>.

Regards,

Dietrich

Hallo Dietrich,

kannst Du bei der LabVIEW Usergroup Hauptversammlung
einen Kurzvortrag über Deine Applikationen machen?

Ich denke, dass neben der Führung durch Holger (?) und den sehr trockenen Themen (z.B. Entlastung des Schatzmeisters) etwas Auflockerung notwendig ist.

Herzliche Grüße

Herbert
