Hi all,

I have a small bug report on the tpc code.

in pandaroot/tpc/tpcreco the PndTpcRiemannMCTask is missing (probably forgot to check in) /pandaroot/tpc/spacecharge/CubSpline.cxx:59: This line shall be commented (as this code is "Work in progress")

That's it.

Kind regards and have a nice start into the week.
Ralf.

Hi Ralf!

Thanks for reminding me! I'll fix that.
Too many construction sites ...

Sebastian.

Thanks - that was fast.

I welcome everyone to the year and revision number 2008

Ralf

Just to notice: Small bug in rev. 2079

pandaroot/tpc/spacecharge/CubSpline.h:44: void setPars(std::vector<double>*

Yes - that looks like someone develops code.
Kind regards from the workshop,
Ralf

Hi,

sorry for the bug

Looks like I managed to somehow produce a last-second typo after the compile check just before checking it in.

It should be fixed now
