Hi all,

there will be a PandaRoot EVO meeting

this Wednesday 16.01.2008, 14:00-16:00

Audio testing from 13:30.

Because of the KVI Workshop next week
this will be a short meeting
(but with at least one important agenda item).

Agenda:

1.) Preparation of the KVI Workshop (all)

As we will start directly on Monday afternoon with Klaus Goetzen's
tutorial about the fast simulation (PandaRoot, not old framework)
and the rho package (the PandaRoot alternative to the beta package).

In order to avoid that everybody at first has to set up network
connection, check out, compile etc. etc. it would be a better idea to be prepared
(in other words, that everybody has already a compiled and running PandaRoot
- and of course external packages - on her/his laptop). So let's try to
find out what everyone needs (e.g. which revision?)
to install already before or over the weekend ...

2.) a.o.b.

- o schedule of PandaRoot meetings in the next few weeks
- o e.g. next combined CbmRoot/PandaRoot meeting? (Johan?)
- o anything else (please feel free to add anything here,
if you have any request ...)

Hope to talk to you all.

Soeren & Johan

Dear all,

An update of the program for the workshop of next week and the kick-off event for the

computing model, can be found at

<http://panda-wiki.gsi.de/cgi-bin/view/Computing/ComputingWorkshopKVIJanuary2008>

We can discuss it in more detail this afternoon,

Johan.

Dear all, i will not be able to take part in the EVO meeting today. Let me know if something new is required for the meeting the next week.

Cheers ALicia.
