Subject: Requirements for an analysis toolset

Hi everybody!

As you know I migrated part of the so called Rho analysis toolset into pandaroot. Since I'm not a real expert about these tools I'm going to visit the original author Marcel Kunze on next friday.

So, if anybody of you has concrete issues about our requirements or ideas about what to discuss with him in particular please let me know by mailing me or posting a follow up here.

I already have a list of very technical questions, but you also might have more general points...

Best regards,
Klaus

So, if anybody of you has concrete issues about our requirements

you should have a look to the Panda Analysis Model paper, especially to the chapter on tools.

 Matthias
