I propose using this wiki page as documentation of the vmplayer tests:

<http://panda-wiki.gsi.de/cgi-bin/viewauth/Computing/VmPlayer>

Could I ask the parties involved to document as much as possible there ? Links, installation and testing procedure, results etc.

I started to put the comments from Mohammad on the Wiki site.

Hi,

Something I learned from Arek Bubak.

An alternative for vmplayer (and really for free)

<http://www.virtualbox.org/>

with a comparison with vmware:
