Hi all, maybe not everyone is subscribed to the PandaGrid forum, so probably it is worth noting that there is an interesting ongoing discussion about an upcoming "data challenge".

 http://forum.gsi.de/index.php?t=msg&th=1821&rid=326&S=b54550
77318093fca4fcdfb129c236a6#msg_6203

The main point is: we started thinking if we can use it for real useful data production (e.g. DPM, UrQMD, stt vs. tpc comparison) and we already proposed some macros.

If you are interested, please take a look.

cheers, Soeren
