Dear all,

there will be NO PandaRoot EVO Meeting this week.

The next meeting will be TUE July 15, 10:00-12:00.

For everyone who works on tracking:

I will update the tracking proposal this week,

but basically the most important issue is:

PLEASE USE the PndMicroCandidate

rho/RhoBase/PndMicroCandidate.h

Based on the positive response on the last meeting (although there was no final vote)
we expect that this will be our unified global track object.

Also please note that for the meetings in the next few weeks we will try to focus a bit on the
open questions

(DRC -> global PID, forward tracking etc. etc.). If you have any comments/questions
concerning these,

you might also consider to post it beforehand to the forum (so that we have some time to think
about it ...)

cheers, Soeren
