Subject: 30.000 lines removed in /trunk on Aug 27

Hi all,

I am preparing the svn statistics for the Ferrara meeting.

On Aug 27 a large fraction of ~30.000 lines were removed from the trunk.

However, in the svn commit log (see below), the number of changed codes lines on Aug 27 is just <1000.

Maybe it was a geometry file or a parameter file? (and therefore it doesn't show up as a code change)

This was ~25% of the /trunk, so it would be interesting to know what it was.

If you have any idea, please let us know!

cheers, Soeren

In the EvtGen Makefiles there were thousand of lines due to all the local libraries of Johan.
In order to solve the bug I have removed them:

spataro 2008-08-27 11:07 #111 Solved bug of the Makefile

0 lines of code changed in:

pgenerators/EvtGen: Makefile (-958)
pgenerators/EvtGen/EvtGenBase: Makefile (-12655)
pgenerators/EvtGen/EvtGenModels: Makefile (-13770)

Only these lines are about 27000.
The lines were added on 14 August, and removed on 27 August. So in theory there should be no difference in total.
