Hi all,

the PandaRoot tutorials in Ferrara on Monday will be as follows:

9-13 INFORMAL Tutorial. The room is reserved and Annalisa has organized power plugs etc. (thanks a lot!). So everyone who likes to attend can do debugging and try other things (e.g. Zernicke moments etc.), and we can also exchange our favourite macros!

14-16 Computing Session

16:30-18:30 OFFICIAL Tutorial on HOWTO get PID related detector information, by Stefano

Hope to see you all,

Soeren (& Johan)

Dear all,
from revision 3632 you can find the code for the lhetrack tutorial of monday afternoon.

Regards

Dear all,

For the Friday tutorial (pandaroot on the GRID), there is a small change: the tutorial will take place in MEETING ROOM 1 (MR1) (the room with airco!)

Johan.
