Dear All,

I am new to PANDA software.

I have installed PANDA external packages "fairsoft_july08.tar.gz" and also installed pandaroot via svn. No errors were found during installation.

I am trying to test EvtGen package (from pandaroot /pgenerators/ EvtGen). I am following the steps from tutorial available at <http://panda-wiki.gsi.de> "How to do Simulation and Reconstruction with PandaRoot".

I am able to compile the EvtGen package without errors. But I am not able to link g2c library.

I am using gcc-4.2.1 which includes gfortran and not g77. Gfortran doesn't have libg2c. Then how to solve this dependency?

I didn't find g77 package for gcc-4.2.1

Thank you very much.

with regards

Sugat V. Shende

Hi,

Maybe this helps:

http://forum.gsi.de/index.php?t=tree&goto=5668&rid=981&S=c0f59d0295f29fadd7a2d831843897fd&srch=evtgen#page_top

Johan.

Hello Johan,

Thanks. It works.

with regards

Sugat

Just to know,
what have you done exactly? Removed the -lg2c ?
