Subject: Problem with compilation of EvtGen

Hello,

I'm trying to configure EvtGen following this link:

http://panda-wiki.gsi.de/cgi-bin/view/Computing/EvtGen

I set the variables CERN_ROOT, ROOTSYS, CLHEP_BASE_DIR, and LD_LIBRARY_PATH

The cernlib are the 2005 version, I did the configure script inside EvtGen, but when I do make depend I have the follow error message.

I have a macbook OS X 10.5

Any idea?
Thank you in advance,
Elisa

For MAC I give up.
Let the "MAC experts" answer you, I have completely no clue on what went wrong.
