Hi,

in PndTools/riemannfit/PndRiemannTrackFinder.cxx there are some references to TrackCand methods setDipError setCurvError getDipError getCurvError. As far as I can tell they dont do anything useful, i.e. those values arent used for anything.

Whoever has write access: Please remove those. Right now I kept these accessors as dummies in TrackCand but they should be removed as soon as possible.

Thanks, Christian

Hi,

does anybody know, who would be a contact person for the riemannfit code? Maybe I can try to contact them directly.

Cheers, Christian

Hi Christian!

I will look into it but I may not make it today...

Cheers!
Sebastian.

Dear Christian,

I have removed the set and get functions for the errors in PndRiemannTrackFinder.

I am sorry for my late reply but I was on vacation last week.

Cheers,

Tobias

Hi Tobias,

thanks for the removal. I removed the dummy accessors in TrackCand.

Bye, Christian
