Hallo,

The new external packages are now available (see <http://fairroot.gsi.de>):

Packages:

ROOT 5.24
Geant4 4.9.2.p01
Geant3.21+vmc. (r245)
VGM 3.02
Geant4 VMC (2.6)
CLHEP 2.0.4.2
ApMon -Application Monitoring API for C++ (v. 2.2.6)
Cmake 2.6.3
GNU Scientific Library (1.12)
PLUTO (v.412)
Pythia6
Boost-Jam (3.1.17)
Boost (1.39)

To download it:

From SVN: `svn co https://subversion.gsi.de/fairroot/fairsoft/release/july09 fairsoft`

tar file: http://fairroot.gsi.de/download/july09/fairsoft_july09.tar.gz

new Features:

CUDA interface and example is added to Fairbase

VGM is now build with cmake

improved installation scripts

tested on:

Mac OS X:	10.5.7
SUSE :	10.3, 11, 11.1
Fedora Core:	8, 9
Scientific Linux	5.1
Debian:	Etch, Lenny
Ubuntu:	8.10, 9.04

P.S:

For those who already used the svn version of this package, you where using the trunk (<https://subversion.gsi.de/fairroot/fairsoft/trunk>) either you make sure that you use the released version (`svn update -r 5991`) or you make a switch (`svn switch https://subversion.gsi.de/fairroot/fairsoft/release/july09 .`)

On the GSI cluster:

Debian Sarge is not supported anymore

GSI users please use lxetch32.gsi.de for logon

Set your SIMPATH to /misc/cbmsoft/Etch32/jul09/fairsoft (or /misc/cbmsoft/Etch64/jul09/fairsoft if you use 64 bit machines).

regards

Mohammad and Florian

Dear Panda-fairsoft developers

New external packages july 09 couldn't compile under Scientific Linux CERN SLC release 4.4 (Beryllium) with 32bit.

An error occurred during cmake compilation.

Probably SLC4 with 64bit seems to be fine, I have tested it at CERN farm.

Best regards,
Donghee

I have tried with SL 4.6 32bit and they have compiled.
Which error do you have?

Dear stepano,

I couldn't catch more detail error message due to automatical closing the login.
cmake part has some problem in this case, trying OS version is the SLC4.4 Beryllium).
I will try once again to get whole message with debug mode.

Ciao,
Donghee

Dear stefano,

find the output error message in attached file.
During cmake installation, some problem occurred.

Ciao,
Donghee

Hi

Maybe these link can help you. For me it looks like a problem with the OS.

<http://www.cmake.org/pipermail/cmake/2009-January/026269.html>

Ciao

Florian

Hello Mohammad and Florian,

when I tried to run the installation script I have observed the following error message:

```
scripts/set_compiler.sh: line 32: [: .: integer expression expected
Could not extract the version of gfortran
Stop script at this point
```

Looking in the set_compiler.sh script I found that among other issues it makes an analysis of the output text of the gfortran -v command. The problem is that I by default use the ru_RU.utf-8 encoding and the output looks a little bit different of what is expected.

To avoid in the future such an issue I would suggest to include in the text of the set_compiler.sh script the following lines:

```
default_lang=$(echo $LANG)
LANG=en_EN.utf-8
in the beginning (to set the needed encoding)
```

export LANG=\${default_lang}
at the end (to restore the default encoding)

I checked this correction - it works at least on my computer.

With the best regards,

Andrey Sokolov

Hi Andrei,

it took too long, but now it is in the fairsoft svn, and will be available in the next release.

Thanks.

Mohammad
