Dear all,

now that it is stated that PndTrack is our standard track object, and now that there is at least one tracking code which is using it as output (even after kalman filter), I think it would be interesting and important to be able to view our PndTrack with our event display.

I have almost zero knowledge about our event display code, for this reason I would like to ask if it is possible to implement such kind of functionality. I think it could be helpful for everybody.

Thanks in advance
