Hi,

the association tools are now available in the repository (directory: "pndbase/AssocTools"). All test applications seem to work properly.

To commit also the test macros, I would like to ask Mohammad to provide a new subdirectory "macro/pndbase". The intention is to put all pndbase related applications into this new directory (including the already existing test macros which are now available in "macro/proxydict").

Thanks in advance,
Bertram.

Hi,

it is done.

Mohammad

Thank you Mohammad!

The test macros for the proxy dict, for the association tools and for std template utils are now available in macro/pndbase.

Bertram.
