Dear colleagues,

After updating pandaroot revision 8366,

I have trouble to access libMVD, could not run any macros.

Quote:

dlopen error: /home/kang/GSI/buildpanda_new4/lib/libMvd.so: undefined symbol:

_ZTV14PndGeoHandling

Load Error: Failed to load Dynamic link library /home/kang/GSI/buildpanda_new4/lib/libMvd.so

Dear Donghee,

I have the same problem if I run macros in macro/pid. The problem is an old rootlogon.C file in this folder. Rename or remove it and it should work.

Cheers,

Tobias

Hi,
probably are you are not using the proper rootlogon.C.
Please try to use the one in gconfig/root, which should work. Maybe in your macro folder you have still an old version.
Please let us know if it will work or not.

Dear colleagues,

With replacing the rootlogon.C, everything looks fine.
Thanks,
Donghee
