Hi,

the PWA related Wiki page with some very basic structure can be found under

http://panda-wiki.gsi.de/cgi-bin/view/PWA/WebHome

The Indico page for the Bochum kick-off meeting is

https://indico.gsi.de/conferenceDisplay.py?confId=974

which also can be found under the item 'Meetings' on the Wiki. The subcategory
Panda/Physics/PWA where all future meetings should be created can be found here

https://indico.gsi.de/categoryDisplay.py?categId=140

I'd ask everybody who presented something to either upload it directly to Indico or send it to
me, so that I can do it.
In case you have ideas about the Wiki structure or content feel free to modify it accordingly.

Best,

  Klaus
