Dear all,

After login at lxetch64, I could not access any fairsoft, for instance
the permission of /misc/cbmsoft//misc/cbmsoft/Etch64/jan10/fairsoft/* is simply denied in shell script!

But if you login directly to lxi019, one can access it!
What is happening in ssh node.

Does anyone have same problem?

Cheers,
Donghee

Hi Donghee,

I try it (ssh lxetch64) and he send me to lxi020 and it works!

So maybe it was a temporary error?

regards

Mohammad

Dear Mohammad,

I think that is the problem only for lxi021.

lxi019 -> fine!
lxi020 -> fine!
lxi021 -> denied!

Thank you for your help!
Donghee

Hi

This is probably a problem with the automounter on that machine. I send a e-mail to our IT department with a request to restart the automounter.

Ciao

Florian
