Dear all,

I have updated the /trunk/tutorials/charmonium.

It now contains 2 directories:

tutorials/charmonium/jul10

-> the new version. It uses PndEvtGenDirect and shows e.g. in the analysis macro, how to apply a E/p cut (for this, you have to remove candidates from a list).

tutorials/charmonium/feb10

-> the older version for the /feb10 stable Pandaroot version (for compiling simpleEvtGen).

wiki is also updated:

<http://panda-wiki.gsi.de/cgi-bin/viewauth/Computing/PandaRootCharmoniumTutorial>

cheers, Soeren
