Hi PandaRooters,

I run in the following problem when I try to compile the latest trunk version:

During CMAKE I get the following message:

CMake Error: Error Target: EvtGen Contains more than one Prefered language: Fortran and CXX
You must set the LINKER_LANGUAGE property for this target.

When I ignore this warning and compile, I get:

[18%] Built target DpmEvtGen
[18%] Built target DpmEvtGen_exe
Scanning dependencies of target Photos
make[2]: Warning: File `pgenerators/EvtGen/photos/CMakeFiles/Photos.dir/depend.make' has modification time 0.41 s in the future
make[2]: *** No rule to make target `of.mod.proxy', needed by `pgenerators/EvtGen/photos/CMakeFiles/Photos.dir/phomak.o.requires'. Stop.
make[1]: *** [pgenerators/EvtGen/photos/CMakeFiles/Photos.dir/all] Error 2
make: *** [all] Error 2

Has anyone an idea where this problem is coming from?

Cheers,

Tobias

Hello Tobias

Which cmake-version are you using. I had the same problem when using and older cmake version(2.4.6) and not the one supplied in the external packages.

Cheers

Sverre

Hi Sverre,

thank you for your reply. This old cmake version was the reason for the problems. I still have to figure out, why it was taken.

Cheers,

Tobias

Hi all,

The build is failing again; this time "pandaroot/drc/DrawHits.cxx" gets the blame, .

The problem comes from a number of undeclared variables

Regards,

Maria has just fixed it. Simply the updated header file was not committed.
