---

Dear all,

Although, both of us, Stefano and myself, are on holidays, I nevertheless pose the question whether there is a need for a meeting tomorrow to discuss some urgent matters that cannot be resolved by email/forum (critical code decision, grid requests for TDR studies, serious user problems, ...) . If so, I would be willing to organize an EVO meeting Tuesday@14. Hence, if you have a request, please post this to this forum by the end of today. If there are no request, the meeting will be cancelled.

Greetings,

Johan.
