Dear Gridka users,

I couldn't make kill my submit jobs.  
Yesterday I sent some jobs, and went quite smooth for few first jobs.

Then next sets of submit jobs are not going to finish.  
That are not completed, and cannot be killed.  
From the alien I have done already  
>masterJob IDs kill  
But in MonALISA those jobs are still activating.  
How can it be? There are no indication like zombie in the monitoring.

Owner is dkang and here are corresponding problematic IDs.

1204074  
1203993  
1203972  
1203971  
1203970  
1203949  
1203948  
1203927  
1203886  
1203885  
1203864

Thank you for your helps.

Try with:

masterJob # -status ZOMBIE resubmit

And you will resend them.

Hi Stefano,

The real problem is that the masterJob IDs was already disappeared after killing them from alien.

```
masterJob # -status ZOMBIE resubmit  
or  
masterJob # -status ZOMBIE kill
```

doesn't work any more due to missing IDs.  
thus Alien couldn't find them.

I try to see the trace for this jobs

021 Tue Aug 2 21:48:15 2011 [submit  ]: Subjob submitted: 1204077  
022 Tue Aug 2 21:48:15 2011 [submit  ]: Subjob submitted: 1204078  
023 Tue Aug 2 21:48:15 2011 [state   ]: Job state transition to SPLITTING  
024 Tue Aug 2 21:48:15 2011 [trace   ]: Using the inputcollection  
LF:/panda/user/d/dkang/collections/list-run931-6  
025 Tue Aug 2 23:44:22 2011 [state   ]: Job state transition to KILLED   |=| procinfotime:  
1312321462 spyurl: finished: 1312321462
```

Jobs are already marked "finished", but MonALIAS said still in the status of "Activate".  
Same problem was happened already few days ago, at that time I killed jobs without any

problem, but now I cannot do it.

I need to contact with administrator of Gridka to kill them.

Best wishes,  
Donghee

Dear Gridka users,

Actually user has a permission only 60 subjobs.  
Yesterday I have seen that submit can go over the top value, i.e., more 60 Jobs. It was happened for me.

Normally alien decide to reject submission for outranging of 60.  
But a large number of CPU was assigned to me at yesterday, after that I got the crash for rest of my subjobs without success or completed.

Cheers,  
Donghee
