Subject: Missing data on GRID for BG runs for TDR
Posted by Tobias Stockmanns on Thu, 18 Aug 2011 09:49:20 GMT

Dear pandaRooters,

I had a look on the background data simulated for the tracking TDR. On the wiki page it is said that e.g. run505 has 1000 jobs DONE (919). But in the folders only 1/3 of the 1000 jobs contain data the rest just have stderr and stdout.

stdout says that the job was successfully finished and one can even see the generated root files on the local working node but it is not available on the GRID.

Can a GRID expert have a look at it?

Cheers,

Tobias

Hi Tobias,

I noticed this as well and also wondered what happened to these old DPM simulations. Lets wait for Dan to be back. Meanwhile you can take the new DPM output runs1000-2002 (TPC still munching, STT ready)....

Greets,

Johan
