Subject: Lambda and Lambdabar channel
Posted by donghee on Mon, 22 Aug 2011 12:44:39 GMT

Dear panda family,

I have couple of question about long distance vertex fitting.
Is there some announced analysis result on the Lambda and Lambdabar vertex fitting with existing fitter in pandaroot.

Where can I find it?

Best wishes,
Donghee

Dear panda member ,
there is no lambda-lambdabar official analysis for the tracking TDR. Somebody has started to do some analysis on this channel, Lia for STT and Sverrefor TPC, but there are no final presentations as for the other channels.
