Hello,

in compiling the latest version of the trunk today I get the following error :

```
/u/gboca/panda/installazione_28sep11/pandaroot/mvd/MvdTracking/LinFit/TtCracowTask.cxx:115: error: integer constant is too large for 'long' type
make[2]: *** [mvd/CMakeFiles/MvdTrk.dir/MvdTracking/LinFit/TtCracowTask.cxx.o] Error 1
make[1]: *** [mvd/CMakeFiles/MvdTrk.dir/all] Error 2
make: *** [all] Error 2
```

Please correct the problem, whoever Mvd expert knows about it.

Thanks in advance

Gianluigi

Hi Gianluigi,

I am sorry for this, my fault. It should be fixed now in rev. 13510.

Cheers,

Simone
