

Dear Friends

I got following error after updating the pandaroot (trunk) during run_sim_stt_evt.C

////////////////////////////////////

Hi,

Due to changes in EMC code, numeration of EMC geometry versions has been changed but it was not updated in all the macros.

So, please check that in your macro in:

```

PndEmc *Emc = new PndEmc("EMC",kTRUE);
Emc->SetGeometryVersion(2);
Emc->SetStorageOfData(kFALSE);
fRun->AddModule(Emc);

```

Emc->SetGeometryVersion(2); or Emc->SetGeometryVersion(1);
 is used.

Dima

Hi,
if you are using run_sim_stt_evt.C, why the tpc geometry is appearing:

PndTpcDetector::SetSpecialPhysicsCuts() Working on medium TPCmixture

```
*****  
PndTpcDetector::SetSpecialPhysicsCuts():  
using special physics cuts ...  
using LOSS=5 for ALICE MC model  
*****
```

?
Maybe you have also messed up something else.

Dear Friends

Thanks for solution.
