Dear all,

if I try to run my simulation with the TGeant4 transport, I get the following error:

Loading libraries ... finished

/misc/cbmsoft/Lenny64/may11/fairsoft/tools/root/bin/root.exe: symbol lookup error:

/misc/cbmsoft/Lenny64/may11/fairsoft/transport/geant4\_vmc/lib/tgt\_linuxx8664gcc/libgeant4vm

c.so: undefined symbol: \_ZN17G4PhysListFactoryC1Ev

With TGeant3 it works.

Do you have a therapy?

Cheers

Olaf.

The problem disappears when using the trunk version of the external packages. Thanks to Denis for making me aware.

Cheers

Olaf.
