Hi,  
I am trying to copy Fairsoft/Pandaroot in my pc through the following command-  
svn co https://subversion.gsi.de/fairroot/fairsoft/trunk fairsoft

But it is giving following error -  
svn: OPTIONS of  
'http://subversion.gsi.de/fairroot/fairsoft/release/may11': could not  
connect to server (http://subversion.gsi.de)

I am a new comer. Can anyone help me?

Thanks in advance.

Ajay

Hi,  
I have just tried without any problems:

```
[spataro@hal ~]$ svn co https://subversion.gsi.de/fairroot/fairsoft/trunk ttt
A ttt/tools
A ttt/tools/configure
A ttt/tools/rootconfig.sh
A ttt/tools/ApMon_cpp-2.2.6.tar.gz
A ttt/tools/ApMon_solaris.patch
A ttt/tools/ml-gsoapclient-2.7.10.tar.gz
A ttt/tools/ml_gcc4.3.1.patch
A ttt/tools/ml_gsoap_solaris_suncc.patch
A ttt/tools/rootconfig_grid.sh
```

Maybe it was just a momentary problem. Is it possible you are installing it in an already existing folder with an older package version?

Hi,  
Thank you Stefano. I have changed something in .subversion/servers file taking help of Manoj. Now svn is working

svn co https://subversion.gsi.de/fairroot/fairsoft/trunk junk

I am able to copy part of it with above command. Now it stuck while copying following file -

A junk/basics/user-config-CC5.jam

I dont understand what is the problem???

I am using Ubuntu 10.10

Help me.
