Dear Panda Grid Members,

In this topic I would like to collect all the problems and wishes to be addressed during the 13th Panda Grid Workshop in Thailand.

To start, I wil name a few:

1. Problem with using of AliEn.v2-20. At least several users see problems when doing "alien login" with the following message:

 /red1/sean/alien/alien.v2-20.27/lib/perl5/site_perl/5.10.1/AliEn/UI/Cata logue.pm
line 571

2. Multiple Authen services (if we will not solve it ourselves)

3. Enabling API services (if we will not solve it ourselves)

4. Deletion of files.

Please do report any problems/comments/wishes.

yours
radek
