Dear all, after svn update to Revision 17557
I was able to compile, but when I tried to run the sim_complete.C macro in macro/run, I got the following error message:

Toggle Spoiler

```
$ root -l sim_complete.C
root [0]
Processing sim_complete.C...
dlopen error: /home/pandaroot_oct12/build/lib/libTracking.so: undefined symbol:
_ZTV14PndTrkChi2Fits
Load Error: Failed to load Dynamic link library /home/pandaroot_oct12/build/lib/libTracking.so
FairRootManager::OpenOutFile("sim_complete.root")
[INFO ] Media file used : /home/pandaroot_oct12/trunk/geometry/media_pnd.geo
Info in (PndGeoHandling::Instance): Making a new instance using the framework.
Error: Symbol PndGemDetector is not defined in current scope sim_complete.C:104:
Error: type PndGemDetector not defined
FILE:/home/simulations/X_with_macro_run20121012withFTS/./sim_complete.C LINE:104
*** Interpreter error recovered ***
```

I am using sep12 external packages.

Thank you very much, Stefano. It seems to work fine now.
