Dear all,
a new SciTil geometry is now inside the trunk, barrel-SciTil_07022013.root, without voxelization problems and now producing correct hits.
Please update your macros.

Dear Stefano,
was this geometry created by using the geometry
 macro I have committed some week ago?

I'm asking that in order to know if
the geometry created by this macro is still giving problems
and if that is the case to
 modify it accordingly.

thanks in advance,
Alicia.

Hi,
this is the geometry created with your macro, which I tested this morning.
The previous geometry from CAD2ROOT had a lot of problems also in creating the points.
