Dear all,
considering the Goa time slots, there is the possibility to use some part of the time, i.e. on monday during parallel sessions or on Thursday morning in parallel to the finance/collaboration boards, for a dedicated tutorial session or for specific computing activities.

Some proposals could be:

a) Analysis tutorial
b) GRID tutorial
c) help in implementing time based simulation
d) Documentation/Wiki updates
e) ?

I would like to ask to the people coming in Goa which topic could be interesting for you, and what would you like to join, or if you have some additional proposals.
I will post the same poll also on FB.

Please let us know as soon as possible, replying to this message.
