Dear all,
in Goa there will be an online+tracking+computing merged session.
This will be held in three time slots: 9:30-11:00, 14:00-15:30, 16:00-18:00.

This is the planned agenda:

(Marius Mertens) Online Tracking Global Scheme & Triplet Finder Status – 15+5min
(Andreas Herten) Online Tracking on GPUs Status – 15+5min
(Mohammad Al-Turany) Flexible data transport for online reconstruction – 30+5min
(Gianluigi Boca) Offline Pattern Recognition and Status of the Secondary Track Finder – 30+5min
(Paola Gianotti) Status of Tracking – 30+5min
(Krzysztof Pysz) Update of dE/dx measurement with Straw Tubes - 20+5min
(Alicia Sanchez) Tracking of low momentum pions using the hypernuclear detector setup – 20+5min
(Ajay Kumar) Simulation for the Lambda Disk – 15+5min

Since some time will be dedicated to discussions, the time slots are only indicative. A SeeVogh connection should be also organized.

See you in a few days!

Dear all,

is there a problem with the SeeVogh or is it just due to my (new) computer? After having misread the starting time of the session in Goa I have been trying to connect to the meeting for almost an hour now, but there seems to be currently no other participant connected and I

cannot hear anything. As SeeVogh TV works fine on this computer I suspect there might be a technical problem in Goa, is that the case?

Kind regards,
Martin

The connection was not so fast and suddenly it broke. It seems we are not able to stream properly the meeting.

Hello Stefano,

are you still trying to fix the problem? Just to know whether to stay connected or not (also here in Pavia I do not see anybody connected in Evo).

Thank you, Pablo

Hi,

I'd also like to connect. Are the talks somewhere available for the upcoming sessions (if the Evo thing can be fixed)?

Best,
Klaus

The connection is too slow to upload the talks somewhere.

Dear All,
the net here in Goa is too slow to set up a SeeVogh connection.
I've also trouble to upload the talks on Indico. I'll do asap.
Sorry
    Paola
