Subject: [FIXED] smth is missing for FairRunAnaProof and FairTrackPar?

Dear all,
I try to compile macro for lmd and got following errors, which are independent from lmd macros:

../../lib/libBase.so.0.0.0: undefined reference to `FairRunAnaProof::RunOneEvent(long long)'
../../lib/libPndData.so.0.0.0: undefined reference to `FairTrackPar::FairTrackPar(FairTrackPar const&)'
../../lib/libBase.so.0.0.0: undefined reference to `FairRunAnaProof::FairRunAnaProof(char const*)'

FairRunAnaProof I don't see in any CMakeList. Is it ok?
For FairTrackPar I have no idea what can be wrong.
Can experts have a look at those classes, please?

Best regards,
Anastasia.

Hi Anastasia,

could you please do an svn update in your pandaroot working directory. The problem with the trackbase should be fixed with
release 19642. The problem with FairRunAnaProof should be fixed
with release 19643. We forgot to add the file to the build system when porting it to the release.

Ciao

Florian

Hi Florian,
Thank you for quick response.
Now new error appear:
/panda/curpandaroot/trackbase/FairTrackPar.h: In member function 'FairTrackParP&
FairTrackParP::operator=(const FairTrackParP&)':
/panda/curpandaroot/trackbase/FairTrackPar.h:94:19: error: 'FairTrackPar&
FairTrackPar::operator=(const FairTrackPar&)' is private

Hi,

now it should be fixed.

Ciao

Florian

Now everything is fine.
Thank you, Florian!

Cheers,
Anastasia

Hi Stefano,

sorry this was not intended.

Ciao

Florian
