Dear all,

next PandaRoot Seevogh meeting will be on 4th November, 10:00 AM CET.

Klaus will present his results for particle identification, Ralf will show residuals from vertex fitters, and after we will focus on the tracking discussion about quality assurance.

Who would like to propose official ways to evaluate our track reconstruction could prepare some table to show, as starting points for the discussion.

Unfortunately, I will not be able to join the meeting, because I am attending a lecture week "Introduction into Statistical Methods" which starts at 10 on Monday...

I'm quite sad to miss the tracking discussion about quality assurance...
